PROFESSIONAL SUMMARY

Full-stack developer and BSIT student (Mobile & Web Applications, Dean's Lister) who builds web and mobile systems for real clients — from database design and APIs to role-based dashboards and mobile apps — using React, Next.js, Expo, FastAPI, and Supabase/PostgreSQL. Open to internships, part-time, and freelance work now, and full-time roles from 2027 (remote OK).

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Java, Python, SQL
Frontend & Mobile	React, Next.js, React Native (Expo), Flutter, Tailwind CSS, HTML5, CSS3, Responsive Design, State Management
Backend & Data	FastAPI, REST APIs, Supabase, PostgreSQL, MySQL, Oracle, Normalization, CRUD, Row Level Security
Tools & DevOps	Git, GitHub, Vercel, Netlify, Render, Figma, Notion, System Design, Documentation & QA Testing

EXPERIENCE

SAHARI PAY — RENTAL MANAGEMENT & PAYMENT PLATFORM

Full-Stack Developer – Solo Client Project | *Ongoing*

- Sole developer of a rental platform for PH landlords and tenants: Next.js admin dashboard, Expo tenant app, and Supabase backend.
- Automated invoices, recurring rent, and due-date reminders via database triggers and scheduled jobs, secured with Row Level Security.
- Shipped payment verification, maintenance requests, messaging, appointments, and push notifications.

KALINGA — CLINICAL & REHABILITATION MANAGEMENT SYSTEM

Full-Stack Developer – Capstone Project, Bridges of Hope Imus | *Completed*

- Delivered a web and Android system replacing paper workflows, with workspaces for Guardians, Nurses, Program Staff, and Admins.
- Built admission/discharge requests, care documentation, recovery tracking, and visitation scheduling with ReactJS and PostgreSQL.

SIGNA2Z — ASL RECOGNITION & LEARNING SYSTEM

Documentation, Quality Assurance & Testing – Team Project | *Completed*

- Owned documentation, QA, and testing for a real-time ASL alphabet translation app on Android and web.
- Tracked bugs in GitHub and coordinated test verification with the team via Microsoft Teams and Messenger.
